PROFESSIONAL SUMMARY

AI & Data Science student with hands-on experience in developing intelligent applications, data-driven systems, and AI-powered automation workflows. Skilled in Python, machine learning, data processing, and modern web technologies with experience building RAG systems, computer vision solutions, and responsive AI-integrated applications. Passionate about solving real-world problems using AI, analytics, and scalable software development practices.

EDUCATION

B.Tech in Artificial Intelligence and Data Science : GPA - 7.7

2022 - 2026

Aalim Muhammed Salegh College of Engineering (**Anna University**)

- **Relevant Coursework:** Machine Learning, Deep Learning, Data Analytics, NLP, Artificial Intelligence

INTERNSHIP EXPERIENCE

AI & Data Science Intern – NLC India Limited, Neyveli | On-site

Jan 2025

- Developed and improved web-based industrial management modules for printer monitoring and predictive maintenance systems.
- Worked on backend logic, API integrations, and dashboard-oriented workflows for enterprise operations.
- Collaborated with development teams in a real-world industrial environment using modern software practices.

AI Intern – Cavin Infotech Pvt Ltd (CITPL), | Cuddalore, Tamil Nadu | On-site

Feb 2026 – May 2026

- Worked on AI-based solutions, contributing to model development and implementation while applying machine learning techniques to real-world use cases.

Trainee – Hema's Enterprises Private Limited (HEPL) | Chennai, Tamil Nadu | On-site

June 2026 – Present

- Contributed to enterprise projects and process improvement initiatives.
- Gaining hands-on experience in corporate workflows, business processes, and industry best practices while delivering assigned tasks within project timelines.

PROJECTS

Medical RAG Chatbot

A privacy-focused Retrieval-Augmented Generation system that answers medical queries from user-uploaded PDFs using local embeddings and offline model inference. Designed for secure document analysis without external API dependency.

Tools Used: Python, Streamlit, ChromaDB, GPT4All (Mistral-7B), Sentence Transformers

Smart Waste Segregation using YOLOv5

An AI-based object detection system for identifying plastic waste in water bodies using real-time video streams, supporting environmental monitoring and clean-up initiatives with custom-trained models.

Tools Used: Python, PyTorch, OpenCV, YOLOv5, Custom Dataset Training

PCB Defect Detection System

A deep learning-based classification system developed during internship to detect and categorize PCB defects using computer vision techniques and optimized CNN architectures for industrial use.

Tools Used: Python, TensorFlow/PyTorch, CNN (ResNet/EfficientNet), Image Processing

SKILLS

- **Programming & Development:** Python, JavaScript, PHP, HTML, CSS, GitHub, WampServer, Streamlit, React, Tailwind css
- **AI / ML & Agents:** Machine Learning, Deep Learning (CNN, RNN, ANN), Computer Vision, Artificial Intelligence, Data Science, AI Agents, n8n Automation, Flowise, LiveKit, RAG Systems, Local LLMs, Embeddings, Encoding/Decoding, MCP (Multi-Component Pipeline), Playwright, FastAPI, RestAPI
- **Frameworks/Libraries:** Scikit-learn, TensorFlow, LangChain, LangGraph, OpenCV, PyTorch, OpenCV
- **Data & Visualization:** Power BI, Data Analysis, Database Management, ChromaDB, Exploratory Data Analysis (EDA)

CERTIFICATION & AWARDS

- Completed professional simulation programs and specialized courses in Data Analytics (Accenture), Data Visualization (Tata Group), Machine Learning (IBM), AI & ML (LinkedIn), and AI for India 2.0 (GUVI) during 2023–2024.
- Secured **Third Prize** in the National Level Hackathon (SAMURAI Symposium – Mohamed Sathak College of Engineering, 2025) for developing **Legal Connect**, an AI-based legal guidance and case matching platform.
- Achieved **Runner-Up** position in **Impact-A-Thon X AMS Hackathon (2025)** for building an **AI Portfolio Generator** that automates portfolio creation using AI and n8n workflows.
- Awarded **College Badminton Champion** in inter-department tournaments, demonstrating discipline, teamwork, focus, and agility.
